

Acoustical, fabric wrapped wall panels by eNoise Control are the solution for areas that require noise reduction and need to maintain their aesthetic appearance. Acoustic panels are available in a variety of models and colors for various applications.

Our wall panels are manufactured to the highest standards and are specifically designed as a multi-purpose absorber panel that offers an economical way to resolve reverberant noise problems. Applications for the panels include: schools, universities, offices, airports, churches, restaurants and any area where excess reverberation is a problem.

Fabric wrapped acoustic wall panels provide the ultimate in performance with excellent NRC ratings. Panels are available in four standard thicknesses (1/2", 1", 1 1/2" and 2"), with custom thickness available. Panels are constructed with a 6-7# PCF rigid fiberglass absorber core. The edges are chemically hardened and are available in 4 edge profiles. Panels are available in standard or custom-sizes (up to a maximum of 5' x 10') with custom, designer or C.O.M fabric available.

Installation of the panels is simple; using mechanical clips, adhesive or hook & loop. Consult with one of the eNoise Control experts for advice on the best-suited mounting system for your specific application.

Finishes

- Guilford of Maine – FR701 Style 2100 is standard
- Custom of Designer fabric also available

Mounting Options

- 2 part Mechanical Clip
- Clip & Velcro
- Adhesive
- Impaling Clip

Edge Detail

- Square
- Mitre
- Bevel
- Radius

Acoustical NRC Rating

- 1/2"50-.60
- 1"80-.90
- 1 1/2"90-1.00
- 2" 1.05-1.15

Fire Rating: All components shall have a Class A fire rating per ASTM E-84.
